### **How to accelerate learning with teen and adult students**

Adult learners seldom have enough. This hectic world of ours with its ever-changing demands and pace has placed many time constraints on our teenage and adult population. To us teachers, this means developing innovative strategies and an adapted rationale. It cannot be denied that learning a language does imply continuous, persevering and focused work on skills development. But aren't there areas where we can offer our students shortcuts to learning? This presentation will dig out of traditional methods and approaches those techniques that help us accelerate the process, challenge those which seem to hinder it and explore novel proven successful practices.

# Accelerated Learning

- Lozanov, Bulgarian Psychiatrist, Suggestopedia, 1970s
- Suggestopedia = "suggestion" + "pedagogy"
- Emphasis on student choice
- Focus on the role of the subconscious in the acquisition of knowledge
- Left and right brain hemispheres
- Today it's a multi-method multimedia learning technique that combines instructional games, highly physical learner involvement, metaphorical activities and background music.
